SKILLS

Data Analytics & Visualization: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, Excel, Tableau, Power BI

Financial Analysis & Modeling: Discounted Cash Flow (DCF), 3-Statement Modeling, Scenario Analysis, Capital Budgeting

Machine Learning & AI Tools: Scikit-learn (Regression, Classification, Predictive Modeling), Generative AI (ChatGPT, Prompt Engineering)

Business & Analytical Skills: Data Cleaning, Dashboard Development, Statistical Analysis

Languages: English, Hindi

PROJECTS

Loan Analysis – Lending Club — FinTech / Data Analytics

Conducted exploratory data analysis on loan datasets to evaluate repayment trends, credit grade performance, and interest rate distribution. Built interactive dashboards in **Qlik Sense** to visualize borrower risk profiles and support data-driven lending insights.

Tesla 10-Year Financial Forecast — Finance

Developed a 3-statement financial model (2025–2034) with best, base, and worst-case scenarios. Performed **DCF valuation** and **WACC analysis** to assess Tesla's long-term financial outlook.

Capital Budgeting Model — Finance / Energy

Built a financial model incorporating **NPV**, **IRR**, and sensitivity analysis to evaluate 10-year project feasibility. Integrated revenue, OPEX, and asset roll-forward schedules to determine investment viability.

Virtual Internships (Forage) — Citi & JP Morgan

Completed virtual simulations in financial analysis and investment banking. Delivered company profiling, financial projections, and investor summary reports for client acquisition cases.
